

DANIEL RAMÍREZ VARELA

Backend Developer · .NET / C# / SQL Server

San José, Costa Rica · cdanielrv.823@gmail.com · [linkedin.com/in/daniramiv](https://www.linkedin.com/in/daniramiv) · [Portfolio](#)

SUMMARY

Backend developer with hands-on experience building production-grade .NET systems. Completing a B.Sc. in Computer Systems Engineering (2026). Background in high-stakes banking security shaped a discipline for protocol, pressure, and clear communication. Seeking a first professional role in backend development where code quality and technical direction are taken seriously.

TECHNICAL SKILLS

Languages & Frameworks: C# · ASP.NET (.NET 8 / .NET 9) · Entity Framework Core · SQL Server

Architecture: Clean Architecture · Vertical Slice Architecture · REST API Design · N-Tier

Practices: xUnit (unit testing) · Git · GitHub · Docker (learning) · Linux (Ubuntu)

PROJECTS

Optical Clinic & Retail Management System 2025 – 2026

.NET 8 · ASP.NET · Entity Framework Core · Clean Architecture · SQL Server · 2FA

- Full administrative platform for a multi-branch optical chain: online store with cart and auto-invoicing, appointment scheduling, digital clinical records, workshop order tracking, POS, real-time inventory, payroll, and help desk with SLA.
- Designed from the ground up for multi-branch operation; 2FA implemented for both customers and staff.

Hotel Reservation REST API 2026

.NET 8 · Clean Architecture · EF Core · JWT · SQL Server / SQLite fallback

- REST API for room and booking management. Four-layer Clean Architecture with JWT (Admin/Guest roles), domain rules enforced at the Domain layer, RFC 7807 ProblemDetails for error responses, and automatic SQLite fallback when SQL Server is unavailable.

Math Riddles Web App 2025

ASP.NET MVC · C# · Entity Framework · SQL Server · Autofac

- Web app with sessionless play (GUID cookie), IQ-level progression, strategic power-ups, and speed-based dynamic scoring. Strict N-Tier separation — UI and data layers are fully interchangeable without touching business logic.

EXPERIENCE

Banking Security Professional · G4S (Allied Universal) Sep 2018 – Apr 2025

San José, Costa Rica · 6 years 8 months

- Executed strict operational protocols in a high-cost-of-error environment; transitioned to software development self-taught while working full-time.
- Developed crisis communication, team coordination under real operational dependency, and disciplined decision-making under pressure.

EDUCATION

B.Sc. in Computer Systems Engineering · Universidad Fidélitas 2022 – 2026 (expected)

San José, Costa Rica · Final year
